

# WaterLink SpinTouch DW QUICK START GUIDE

#### **BEFORE FIRST USE**

- Fully charge battery using the Spin Touch USB cable and adapter plug in AC outlet.
- Ensure your Spin Touch has latest firmware. A USB connection to a Windows<sup>®</sup> PC is required:
  - Download and install WaterLink Connect 2 Application for Windows at softwarecenter.lamotte.com. Select WaterLink Connect 2 Software for Windows FREE Download.
  - 2. Plug meter into the computer with the provided USB cable and launch WaterLink Connect 2 Application from the Start Menu.
  - A prompt will appear if firmware updates are available. Select Update. Testing and data transfer will not be possible until firmware has been updated.

NOTE: For water samples over 100 °F (38 °C) subtract 0.1 from pH result or, for the most accurate result, wait until water sample is below 90 °F (32 °C) to test.

Remove residue daily. Residue will damage the meter and cause inaccurate results. See Cleaning in manual.

#### TESTING

- 1. Press and hold until the meter turns on.
- 2. Tap 📄. Select a Water Source type. Tap 💧 to confirm.
- Tap (). Select a disk series (found on disk packaging). Tap () to confirm.

NOTE: Disk Series are limited by Water Source Type selection.

- 4. Remove a SpinDisk<sup>™</sup> from the packaging.
- 5. Use the syringe (1189) to fill the disk with the water sample.
- 6. Insert the disk. Cover the disk with the Universal Disk Cover (1719). Close the lid.
- 7. Tap 🔘 to start test. Tap 😒 to stop the test. If the test is cancelled discard the disk.
- 8. The results will be displayed.
- 9. Choose an option.
  - Tap 🎯 to add a tag.
  - Tap the highlighted 📄 to save the test results to the test log if Auto Save is not enabled.
  - Tap the hightlighted 🚍 to send the results to the enabled Mobile Bluetooth Printer.
  - Tap the highlighted *is* to send the results to a Bluetooth enabled device.
  - Tap 👌 to return to the Test Screen.
- 10. REMOVE THE DISK FROM THE CHAMBER. DISPOSE OF THE DISK. Disks left in the chamber can leak and damage the device. Do not store the disk cover on the hub.
- 11. Press and hold for 2 seconds to turn the meter off.

## DOS & DON'TS

- Hold syringe vertically when filling disks.
- Do not fill disk while in the meter. Fill disk on clean, dry surface.
- The disk should not contain any large air bubbles. Air bubbles will result in erroneous results.
- Only the Universal Disk Cover (Code 1719) can be used with the WaterLink Spin Touch.
- Empty syringe of old sample before filling with next sample.
- Remove filled disk from meter after testing. Do not travel with filled disks in meter. They may leak.
- Store disks at 70°-80°F/21°-27°C.

- Keep the chamber clean and dry. Gently swab LED and photodiode lenses located around the hub with a cotton swab dampened with streak-free window cleaner. Do not use alcohol. It will leave a thin film over the lenses when dry.
- Go to SETTINGS>Other Settings to select hardness and nitrogen units. Nitrogen results can be reported in ppm Nitrate-N units or ppm Nitrate units. 1 Nitrate-N unit = 4.4 Nitrate units.
- Do not store the disk cover on the hub.

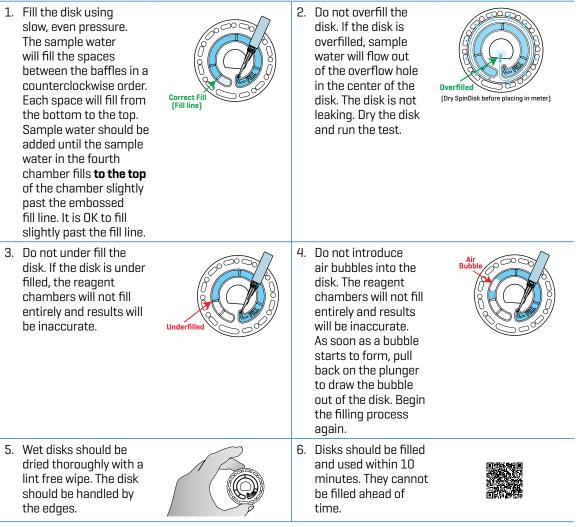

## **BLUETOOTH CONNECTION**

The WaterLink Spin Touch is capable of connecting to a Bluetooth enabled device, such as a phone or tablet. The Spin Touch is also compatible with a BLE Mobile Printer (5-0067). Other Bluetooth printers are not supported.

Transferring results over Bluetooth to a mobile device requires that a mobile app is installed on the device and an active account for the associated software program. For example, with an active WaterLink Solutions<sup>™</sup> account and the WaterLink Solutions mobile app on a phone or tablet, results can be transferred from the meter into the application. Mobile apps for LaMotte software products are available on iTunes<sup>®</sup> (iOS<sup>®</sup> devices) and Google Play (for Android<sup>™</sup> devices).

For detailed information read the Spin Touch manual. Go to softwarecenter.lamotte.com to learn more about LaMotte software products.
